## Data that describes child care – statewide and in California counties

As it prepares to celebrate its 30th anniversary, the California Child Care Resource & Referral Network proudly presents its seventh biennial compilation of child care data for the state and for each of California's 58 counties. For 30 years, child care resource and referral (R&R) programs have worked with families, child care providers, and policymakers. These 'on-the-ground' relationships have enabled R&Rs to collect data about child care supply and demand, and to understand the concerns of parents and providers.

Child care request data is gathered from the tens of thousands of calls made to R&Rs across the state, as families attempt to locate appropriate child care. Parents often request specific types of care based on location, language, or work schedules. These calls represent an important sample of families and their needs. However, not all families who need child care contact their local R&R. Parents get information from many sources, including friends and family.

Information about the supply of child care is based on R&R databases of active, licensed providers (as of January 2008).

Census and other demographic information included in the *2009 Child Care Portfolio* are intended to complement the R&R data and to set the stage to better understand the need for child care.

**The California Child Care Resource & Referral Network** – with the local R&Rs – recruits and trains providers; advocates for quality, affordable, and accessible child care; and documents child care supply and demand. The data provided here is intended to support the continuing efforts of R&Rs, families, providers, and policymakers as they consider the critical role child care plays in society. For copies of the *2009 Child Care Portfolio* for each county and for the state of California, visit [www.rrnetwork.org](http://www.rrnetwork.org).

PEOPLE	COUNTY			STATE		
	2006	2008	CHANGE	2006	2008	CHANGE
