### A decade of data about child care in California counties

Locally-based child care resource and referral programs (R&Rs) are located in every county in California. Their services have evolved over 30 years—from a grassroots effort to help parents find child care, to a well-developed statewide system that supports parents, providers, and communities to find, plan for, and develop quality child care that is affordable and accessible.

In 1997, following a two-year effort to standardize the data collection of the 61 R&Rs across the state, the California Child Care Resource & Referral Network launched the first *Child Care Portfolio*, a report which documented child care supply and demand, and portrayed the trends and needs of real families as they struggle to find appropriate, quality care for their children, especially as they juggle work and family. *The Portfolio* has been produced biennially since that time. The information presented here offers a picture of the supply and demand for child care in Placer County, as well as relevant demographics about children and families. The data reflects the most up to date information available and comes from a variety of sources, including the R&R's interaction with parents and providers.

For a copy of the *2007 Portfolio*, including county data pages, visit [www.rrnetwork.org](http://www.rrnetwork.org).
